Supreme Court of Ohio (pending)	1.5 CE points

# The Intersection of Artificial Intelligence (AI), Forensic Psychology, and Criminal Justice and the Impact on the Role of Interpreters and Translators

PRESENTED BY RITA PAVONE, PhD, MPhil, CCMS, MA

Advances in artificial intelligence (AI) are intended to simulate human cognitive functions and evaluation capabilities. This presentation provides examples of the use and “seductive allure” of AI in medical, psychotherapeutic, and criminal justice arenas, while also highlighting the implications for a “black box” effect in decision-making. An exploration of the connection between AI application in these fields and the role of interpreters and translators will be offered, along with a discourse regarding possible biases, fairness in processes, information accuracy, and preservation of human rights. Finally, a note will be devoted to how interpreters/translators may inadvertently inherit ethical issues by virtue of their role and service.

[Language neutral]

**Rita Pavone, PhD, MPhil, CCMS, MA**

Dr. Rita Pavone is an experienced interpreter and translator, serving in a variety of contexts, including holding a public trust role as a Linguist/Translator for the Department of Justice.

Dr. Pavone has a Certification in Crisis Management, an Advanced Degree in Foreign Languages and Linguistics, a Master of Arts in Communications Management, a Master of Philosophy in Advanced Research/Public Policy and Administration, and a Doctor of Philosophy in Public Policy & Law and Criminal Justice. She is currently pursuing a MS in Forensic Psychology.

As a policy/regulations researcher and speaker, she manages projects that focus on communications, conflict management, criminal justice, cultural competence, education, ethics, healthcare, interpreting/translation, and public policy. She has taught a variety of undergraduate courses and worked in clinical trials/bioethics and in legal contexts. As a member of various committees and honorary associations, she contributes a wealth of perspectives, as well as experiential and academic foundations to her endeavors.
